SAVE EL PASO'S FRANKLIN MOUNTAINS!

MOUNTAIN TO RIVER TRAIL PETITION

The City of El Paso's Open Space Master Plan calls for a mountain to river trail using Arroyo 41A, the last unobstructed arroyo connecting the Franklin Mountains to the Rio Grande. This arroyo can provide a unique setting for recreational activities for El Pasoans and visitors as well as maintain important wildlife habitat. Quarrying activities planned on General Land Office leased land adjacent to and including parts of Arroyo 41A threaten the integrity and viability of that trail and a portion of Franklin Mountains State Park. We the undersigned urge our political leaders to work with the quarry operator to prevent quarrying from occurring on land in or adjacent to the planned mountain to river trail and to maintain the original design of this valuable recreational and wildlife corridor.
